5. VALUATION APPROACH

5.1 Approaches for Valuation

There are three generally accepted approaches to valuation:

- a. "Cost" Approach
- b. "Income" Approach
- c. "Market" Approach

a. Cost Approach

Cost approach is a valuation approach that reflects the amount that would be required currently to replace the service capacity of an asset (often referred to as current replacement cost). The following are the two most commonly used valuation methods under the cost approach

Replacement Cost Method:

Replacement Cost Method, also known as 'Depreciated Replacement Cost Method' involves valuing an asset based on the cost that a market participant shall have to incur to recreate an asset with substantially the same utility (comparable utility) as that of the asset to be valued, adjusted for obsolescence.

The following are the major steps for deriving value under Replacement Cost Method:

- ❖ Estimate the costs that will be incurred by a market participant for creating an asset with comparable utility as that of the asset to be valued;
- ❖ Assess whether there is any loss on account of physical, functional or economic obsolescence in the asset to be valued; and

Page 9 of 15

OF MUMBAI LIMITED

K. J. MALLIYA
Company Secretary

- ❖ Adjust the obsolescence value, if any as determined under (b) above from the total costs estimated under (a) above, to arrive at the value of the asset to be valued.

We have used replacement cost method for our valuation exercise by estimating the net replacement/realizable value of Land and investments and assuming all other assets and liabilities would be realized at book value. To the value so arrived, adjustment are made towards contingent liability & fair value towards the preference share capital, as applicable, to arrive at the value for the equity shareholders

Reproduction Cost Method

Reproduction Cost Method involves valuing an asset based on the cost that a market participant shall have to incur to recreate a replica of the asset to be valued, adjusted for obsolescence.

The following are the major steps in deriving a value using the Reproduction Cost method

- ❖ Estimate the costs that will be incurred by a market participant for creating a replica of the asset to be valued.
- ❖ Assess whether there is any loss of value on account of physical, functional or economic obsolescence in the asset to be valued.
- ❖ Adjust the obsolescence value, if any as determined above from the total estimated costs, to arrive at the value of the asset to be valued.

b. Income Approach

The "Income" approach focuses on the profit/earnings potential of the business being valued. The Income Approach to valuation includes Discounted Cash Flow ("DCF") Method. The "Income" approach focuses on the income generated by the company as well as its future earning capability.

DCF Method:

- ❖ The DCF Method seeks to arrive at a value of a business based on the strength of its future cash flows. This method also captures the risk involved with these cash flows.
- ❖ Under this method, the business is valued by discounting its free cash flows for an explicit forecast period and the perpetuity value thereafter. The free cash flows to the firm

Page 10 of 15

SHARP & TANNAN LIMITED

 K. J. MALLYA
 Company Secretary

("FCFF") represent the cash available for distribution to both the owners and the creditors of the business. The free cash flows in the explicit period and those in perpetuity are discounted by Weighted Average Cost of Capital ("WACC"). WACC is an appropriate rate of discount to calculate the present value of the future free cash flows as it considers debt-equity risk and also debt-equity ratio of the company/industry.

- ❖ To the present value of the cash flows so arrived, adjustments are made for the value of debt, surplus/non-operating assets including investments, surplus cash & bank balance, contingent assets/liabilities and other liabilities and value towards preference share capital, as applicable, in order to arrive at the value for the equity shareholders.
- ❖ We have used DCF method for our valuation by using projections provided to us by management.

c. Market Approach

Market Price Method:

Under this method, the market price of an equity share as quoted on a recognized Stock Exchange is normally considered as the value of the equity shares of that company, where such quotations are arising from the shares being regularly and frequently traded. The market value generally reflects the investors' perception about the true worth of the company.

Since the shares of ML and MEL are listed on NSE and BSE and there are regular transactions in their equity shares with reasonable volumes. In the circumstances, the share price of ML and MEL, over an appropriate period has been considered for determining the value of ML and MEL, under the market price methodology.

Market Multiple Method:

- ❖ Under Market Multiple Method, the value is determined on the basis of multiples derived from valuations of companies in the same industry, as manifested through stock market valuations of listed companies.
- ❖ This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

- ❖ ML is a diversified company having different nature of business operations, so, we could not find the exact comparable company for ML. In the absence of sufficient comparable companies, we have not used this approach for ML. Further, for MEL also, we have not applied Market Multiple Method.

Market Transactions Method:

- ❖ With regard to the multiples applied in an earnings based valuation, they are generally based on data from the recent transactions in a similar sector, but with appropriate adjustment after due consideration has been given to the specific characteristics of the business being valued.
- ❖ In the absence of any comparable transaction in the recent past in respect of which complete details of deal structure, etc. are not available in public domain, we are unable to apply Market Transaction method.

5.2 Valuation Methodologies Applied

Arriving at the share exchange ratio for the Proposed Amalgamation would require determining the value of the equity shares of MEL in terms of the value of the equity shares of ML. These values are to be determined independently but on a relative basis.

It should be understood that the valuation of any company or its assets is inherently subjective and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies, and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. In arriving at the value of the equity shares of ML and MEL, from amongst the generally accepted valuation methodologies, we have applied methodologies most relevant, applicable and appropriate to the circumstances.

A brief overview of the valuation methodologies applied for each company is outlined below:

5.2.1 ML

- ❖ **Income Approach - DCF Method:** Under this method, the operating business of ML has been valued by discounting the free cash flows for an explicit forecast period and the perpetuity value thereafter by WACC. To the present value of the cash flows so arrived, adjustments have been made for Contingent liabilities and MAT credit to arrive at the Enterprise Value. To the Enterprise Value, appropriate adjustment has been made for net debt, non-operating assets (i.e. Surplus Land, Non-Current Investments) & other Net assets of the company to arrive at Value for Equity & Preference shares of ML and post reduction of present value of preference shares to the above value, equity value for equity shareholder has been worked out.
- ❖ **Market Price Approach - Market Price Method:** Under this method, equity value of ML has been determined based on 6 months Volume Weighted Average Price as on 13th July, 2018 using NSE data¹.
- ❖ **Cost Approach - Replacement Cost Method:** In the replacement cost approach for all assets and liabilities we have considered the book value as replaceable value except investment and land in use whose replacement value has been estimated based on the current market value. For the land which are surplus in nature, it has been assumed that the same will be sold in near future & net realizable value (post tax & transaction cost) has been considered. To the value so arrived at, adjustments have been made for Contingent liability and present value of preference shares to arrive at value for the equity shareholders.
- ❖ Appropriate weightage has been applied to each of the above mentioned methods to arrive at the Weighted Average Equity Value of ML.
- ❖ For arriving at the equity value of ML, we have applied various methods as summarized below:

Valuation Approach	ML
Cost Approach	✓
Income Approach	✓

INTERNAL RISK FACTORS

The Company being a Non-Banking Financial Company (NBFC) engaged in activities of loans and investments, there are following inherent risk factors:

1. The profitability and financial condition of the Company can be affected due to non-payment by the borrowers due to their potential inability to adapt to changes in the economic scenario, industrial scenario, global technologies, Indian regulatory and political environment. This may lead to an increase in the value of Company's non-performing assets.
2. Company's financial performance is particularly affected by interest rate volatility. Interest rates are sensitive to many factors beyond its control, including the monetary policies of the RBI, domestic and international economic and political conditions, inflation and other factors. Any fluctuations in the interest rates can adversely affect its borrowing costs, interest income and net interest margin, which can adversely affect results of its operations.

3. The business of the Company requires substantial working capital. Its ability to borrow on acceptable terms and at competitive rates continues to depend on various factors, *inter-alia*, the regulatory environment, liquidity in the markets, policy initiatives in India, and its current and future results of operations and financial condition. Any disruption in debt funding sources will have a material adverse effect on the financial condition, results of operations and cash flows.
4. It is subject to regulations framed by applicable authorities. There can be no assurance that the applicable laws will not change in the future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not affect Company's business and future financial performance.
5. If the Company is unable to comply with the capital adequacy requirements stipulated by the RBI, its business, results of operations and cash flows may be materially and adversely affected.
6. Part V of Scheme provides that in the event this Scheme is not sanctioned by NCLT, this Scheme shall become null and void. Each company shall pay and bear their respective costs, charges and expenses in connection with this Scheme. This exposes the Company to the risk of bearing costs, charges and expenses in connection with the Scheme.

The management, considering the valuation of unencumbered fixed assets and value of current assets of BFL, considers the balance 'net exposures' to be 'Good' and adequately covered and barring unforeseen circumstances expects full realisability of the same in future.

- b. The Company in previous years executed road construction projects in the state of Uttar Pradesh with National Highway Authority of India (NHAI) along with Centrodorstroy (CDS), Russia. The exposure on this account as at 30th June 2019 aggregated Rs. 121.52 Crore as compared to Rs.121.47 Crore as at 31st March 2019. Arbitral Tribunals gave its awards towards claims in favour of CDS. NHAI and CDS have settled the claims at Rs.125.71 Crore to avoid further litigation. The final settlement of Company's dues with CDS is under progress. In the opinion of the management, exposure of the Company would be realized fully.
5. The figures of last quarter of FY 2018-19 are the balancing figures between audited figures in respect of full financial year and the published year to date figures upto the third quarter of the said financial year.
6. Figures in respect of the previous period have been regrouped / recast wherever necessary in case of above results.

Independent Auditor's Review Report on quarterly Unaudited Standalone Financial Results of Mukand Limited pursuant to the Regulation 33 of SEBI (Listing Obligations and Disclosures Requirements) Regulations, 2015

To the Board of Directors

Mukand Limited

1. We have reviewed the accompanying Statement of Unaudited Standalone Financial Results of Mukand Limited ("the Company") for the quarter ended June 30, 2019 ("the Statement"), being submitted by the Company pursuant to the requirement of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended.
2. This Statement, which is the responsibility of the Company's Management and approved by the Board of Directors, has been prepared in accordance with recognition and measurement principles laid down in Indian Accounting Standard 34 "Interim Financial Reporting" as prescribed under Section 133 of Companies Act, 2013 read with relevant rules issued there under and other accounting principles generally accepted in India. Our responsibility is to issue a report on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagement (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review is limited primarily to inquiries of the company personnel and analytical procedures applied to financial data and thus provide less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.
4. Based on our review conducted and procedures performed as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, including the manner in which it is to be disclosed, or that it contains any material misstatement.
5. We draw attention to the followings :
 - (i) Note 4(a) to the Statement, relating to exposures in Bombay Forgings Limited ("BFL") aggregating Rs. 94.50 crores (gross) as at June 30, 2019 (Rs. 92.23 crores (gross) as at March 31, 2019). The Management has created a provision of Rs. 48.50 crores (approximately) on this exposure following the expected credit loss principle and, barring any significant uncertainties in future, has relied upon the valuation of unencumbered fixed assets and the value of current assets for the balance portion of exposure in BFL.

- (ii) Note 4(b) to the Statement, relating to the exposures aggregating Rs. 121.52 crores as at June 30, 2019 (Rs. 121.47 crores as at March 31, 2019), in respect of road construction activity, the claims for which have been awarded to Centrodorstroy (CDS) Russia by the Arbitral Tribunals, which has been subsequently settled between NHAI and CDS at Rs 125.71 crores. The final settlement between CDS and the Company is under process. The Management expects to realise its exposure fully.

Our report is not modified in respect of these matters.

Independent Auditors Report On Unaudited Quarterly Financial Results of the Company Pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (as amended).

To the board of directors of

Mukand Engineers Limited

1. We have reviewed the accompanying statement of standalone unaudited financial results ('the Statement') of Mukand Engineers Limited ('the Company') for the quarter ended 30 June 2019, being submitted by the Company pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (the Regulations) (as amended), read with relevant circulars issued by the SEBI from time to time.

2. The Statement, which is the responsibility of the Company's Management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 ('Ind AS 34'), "Interim Financial Reporting", prescribed under Section 133 of the Companies Act, 2013 ('the Act') read with relevant rules issued thereunder, SEBI Circular dated 5 July 2016, and other accounting principles generally accepted in India. Our responsibility is to express a conclusion on the Statement based on our review.

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity, issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the Standards on Auditing specified under Section 143(10) of the Act, and consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

4. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in applicable Indian Accounting Standards specified under Section 133 of the Act read with the SEBI

Circular, and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in accordance with the requirements of the Regulations including the manner in which it is to be disclosed, or that it contains any material misstatement.
