Mukand Limited Powers Forward with 23.89 MWp Group Captive Solar Project

The collaboration with APEPL underscores Mukand's dedication to reducing its carbon footprint and embracing non-conventional energy solutions. Scheduled for commissioning by March 2024, this solar power plant adheres to stringent quality standards and specifications, ensuring reliability and operational excellence. The aim of the installation is to meet the growing energy requirements of Mukand Limited and contribute to making their steel manufacturing processes and production greener. APEPL will undertake the construction, operation, and maintenance of this group captive solar power plant.
