Last Updated: 13 Feb, 2026

Mukand Ltd, part of the Bajaj Group, has secured the Green Steel certification from the National Institute of Secondary Steel Technology. The recognition highlights its progress in sustainable manufacturing. With industries facing rising pressure to decarbonise, could such certifications reshape how steelmakers compete and create value? The certification acknowledges Mukand's Black Bars with a 5 Star rating, while its Wire Rods and Bright Bars received a 4 Star rating. The audit involved detailed verification of Scope 1, 2, and 3 greenhouse gas emissions, plant energy consumption, and production data at Mukand's Thane facility.
